Review Team Assessment of material’s compliance with Section 1:  
 The scope of information covered and the depth in which the information is explored through activities, is impressive. The activities and tasks are thoughtful, meaningful and relevant and allow for expression thorough multiple modalities and learning styles. The activities and assessments are explicit and allow for natural differentiation within the lessons. The differentiation is more implicit, but it is strong. The range of assessment are particularly strong and varied and include formative, summative, portfolio, and quick check lists. It is easy to assess skills, knowledge and performances and students will be able to accurately assess their own understandings and abilities. It is a strong, comprehensive and engaging series that teachers will do well implementing in classes, and most importantly, students will benefit from the experiential learning opportunities and resulting gains in empowering skills and knowledge.

Guidance for completing this section:  
 1. Focus on the NM Content Standards and Benchmarks assessed in Section 1  
 2. Ensure that the narrative is consistent with the individual and average score for Section 1. That is, if the score are in the 90% range, you should not be focusing on how the text does not meet common core standards.
