

The New Mexico End-of-Course Advisory Committee

Established June 2016

Who We Are:

We are educators, analysts, researchers, district leaders, and leaders in the fields of assessment and instruction. Our goal is to strengthen the End-of-Course (EoC) Exams through the following actions:

- Advocate for item quality on exams and support the professional development of New Mexico teachers as item writers.
- Support the use of EoC results to inform instruction and increase student achievement.
- Leverage technology for assessing, scoring and reporting through the development of New Mexico's *Exam Platform for Informing Curriculum (EPIC)*.

Meet the EoC Advisory Committee
